- AB Title compds. I [wherein R1 - R4 = H, halo, (un)substituted alkyl, cycloalkyl, heterocyclyl, (hetero)aryl, nitro, cyano, alkoxy, ester, thioether, sulfonyl or amino; R5 = H, (un)substituted alkyl, cycloalkyl or heterocyclyl; R6 - R9 = H, (un)substituted alkyl, cycloalkyl, heterocyclyl, cyano or ester; W = (un)substituted alkyl, cycloalkyl, heterocyclyl, (hetero)aryl, amino or carbonyl; etc., and stereoisomers, racemates, salts or solvates thereof] were prepared as inhibitors of serotonin receptor 5-HT6, via reaction of 4-benzoxazinone-substituted piperidines or their salts with sulfonyl chlorides. For example, treatment of II·HCl with quinoline-8-sulfonyl chloride in the presence of DIPEA in DCM gave III in 69% yield, which showed inhibition against serotonin receptor 5-HT6 (Ki = 152 nM). Therefore, I and medicaments thereof are useful in the treatment and/or prophylaxis of disorders that are at least partially mediated via 5-HT6 receptors, such as food intake disorders.

- AB Based on a medicinal chemical guided hypothetical pharmacophore model, novel series of indolyl sulfonamides have been designed and prepared as selective and high-affinity serotonin 5-HT₆ receptor ligands. Furthermore, based on a screening approach of a discovery library, a series of benzoxazinepiperidinyl sulfonamides were identified as selective 5-HT₆ ligands. Many of the compds. described in this paper possess excellent affinities, displaying pK_i values greater than 8 (some even >9) and high selectivities against a wide range (>50) of other CNS relevant receptors. First, structure-affinity relationships of these ligands are discussed. In terms of functionality, high-affinity antagonists, as well as agonists and even partial agonists, were prepared. Compds. 19c and 19g represent the highest-affinity 5-HT₆ agonists ever reported in the literature. These valuable tool compds. should allow for the detailed study of the role of the 5-HT₆ receptor in relevant animal models of disorders such as cognition deficits, depression, anxiety, or obesity.

AB Title compds. I [wherein R1 - R4 = H, halo, (un)substituted alkyl, cycloalkyl, heterocyclyl, (hetero)aryl, nitro, cyano, alkoxy, ester, thioether, sulfonyl or amino; R5 = H, (un)substituted alkyl, cycloalkyl or heterocyclyl; R6 - R9 = H, (un)substituted alkyl, cycloalkyl, heterocyclyl, cyano or ester; W = (un)substituted alkyl, cycloalkyl, heterocyclyl, (hetero)aryl, amino or carbonyl; etc., and stereoisomers, racemates, salts or solvates thereof] were prepared as inhibitors of serotonin receptor 5-HT6, via reaction of 4-benzoxazinone-substituted piperidines or their salts with sulfonyl chlorides. For example, treatment of II·HCl with quinoline-8-sulfonyl chloride in the presence of DIPEA in DCM gave III in 69% yield, which showed inhibition against serotonin receptor 5-HT6 (Ki = 152 nM). Therefore, I and medicaments thereof are useful in the treatment and/or prophylaxis of disorders that are at least partially mediated via 5-HT6 receptors, such as food intake disorders.

AB Based on a medicinal chemical guided hypothetical pharmacophore model, novel series of indolyl sulfonamides have been designed and prepared as selective and high-affinity serotonin 5-HT₆ receptor ligands. Furthermore, based on a screening approach of a discovery library, a series of benzoxazinepiperidinyl sulfonamides were identified as selective 5-HT₆ ligands. Many of the compds. described in this paper possess excellent affinities, displaying pK_i values greater than 8 (some even >9) and high selectivities against a wide range (>50) of other CNS relevant receptors. First, structure-affinity relationships of these ligands are discussed. In terms of functionality, high-affinity antagonists, as well as agonists and even partial agonists, were prepared. Compds. 19c and 19g represent the highest-affinity 5-HT₆ agonists ever reported in the literature. These valuable tool compds. should allow for the detailed study of the role of the 5-HT₆ receptor in relevant animal models of disorders such as cognition deficits, depression, anxiety, or obesity.
